Anna Testsson

Summary

QA engineer with five years of experience in manual and automated testing of web applications. Skilled in test planning, exploratory testing and building reliable automated regression suites.

Skills

Python, Playwright, Selenium, API testing, Postman, SQL, Jira, CI/CD, GitHub Actions, test strategy, regression testing, Agile and Scrum

Experience

QA Engineer, Example Software AB, Stockholm, 2022–2025
- Designed and executed test plans for a customer portal with fifty thousand users.
- Built automated end-to-end tests with Playwright and Python, cutting regression time by sixty percent.
- Performed API testing with Postman and added the checks to a CI/CD pipeline on GitHub Actions.
- Reported and triaged defects in Jira with developers and product owners in an Agile team.
- Mentored two junior testers in exploratory testing and test case design.

Test Analyst, Sample Systems AB, Gothenburg, 2019–2022
- Executed manual regression and acceptance tests for a payment platform before every release.
- Wrote SQL queries to verify data integrity across several back end services.
- Documented test cases and kept traceability between requirements and test results.
- Worked with customer support to reproduce reported issues and verify the fixes.

Education

BSc in Computer Science, Example University, Stockholm, 2015–2018
ISTQB Certified Tester Foundation Level, 2021

Projects

- CV checker: a local Python tool that analyses CVs and reports ATS issues.
- Playwright demo suite: end-to-end tests for a sample web shop run on GitHub Actions.
